Sustainable Procurement of Pharmaceuticals

The impact of pharmaceutical pollution on water quality
8 June 2017

Lorea Coronado-Garcia
UNDP Sustainable Supply Chains Specialist
lorea.coronado-garcia@undp.org
SPHS Task Team is, through a transparent and inclusive engagement process, leveraging its normative and market power, lowering the environmental impact of its procurement, with a final aim of improving human health and well-being.

Global production
global consumption
global footprint

Hyderabad, India 2013
Linking our work to the Sustainable Development Goals and Key Focus Areas
Strategy on Engaging with Suppliers and Manufacturers on Green Health Procurement
Chemical Substitutions

- List of key hazardous products for substitution in UNDP procurement
- In the list: TB (antibiotic) and HIV/AIDS (antiretroviral) pharmaceuticals

A UNDP Guide For Procurement Practitioners

- Measure and monitor the status and progress of healthcare procurement related to the compliance with International Environmental Conventions
- Indicators - a building block of the GPIH and the compliance with International Environmental Conventions
Questionnaire and OET

A user-friendly and dynamic tool which provides comprehensive overview of the environmental performance of suppliers and manufacturers of health commodities and services.

Interested in testing this tool, which was developed in consultation with leading technical experts? Please contact us at info@savinglivesustainably.org
Solar For Health Initiative

To assess the possible environmental impact of GF grants, rapid assessments on healthcare waste were carried out

- Generally applicable recommendations to all GF-funded health programmes
- Context specific recommendations to particular country

Pathways of Environmental Footprint in Healthcare Waste
UNDP developed a practical toolkit for healthcare waste management.

Sustainable Public Health Procurement Trainings

UNDP-UNEP-HCWH support government officials to design and implement sustainable public health procurement policies that equally factor in the social, economic and environmental impact of their operations.

Interested in hosting a training in your organization? Please contact us at info@savinglivessustainably.org
